HR Hiring Policy

1. Hiring Process

a) Sourcing Channels

- Internal Referrals: Encourage employee referrals with referral bonuses.

- Job Boards: LinkedIn, Indeed, Glassdoor, AngelList (for startups), Stack Overflow Jobs.

- University Outreach: Partner with universities for entry-level talent.

- Specialized Platforms:

- Backend: GitHub Jobs, Stack Overflow.

- AI Engineer: Kaggle, AI/ML forums.

- Full-Stack: RemoteOK, Dev.to job boards.

- Recruitment Agencies (if internal sourcing is insufficient).

b) Screening Methods

- Resume screening based on mandatory technical skills and relevant experience.

- Automated skills assessment tests (HackerRank, Codility).

- DEI checklists applied to ensure unbiased filtering.

c) Interview Stages

1. HR Screening Call – Verify basic fit, salary expectations, and availability.

2. Technical Round(s) – Role-specific coding challenges and system design.

3. Behavioral & Soft Skills Interview – Evaluate communication and teamwork.

4. Manager/CTO Interview – Cultural fit, project alignment, and final approval.

d) Evaluation Criteria (Role-Specific)

- Backend Developer: Clean code, REST API development, database management, scalability.

- AI Engineer: ML/DL model design, data preprocessing, deployment knowledge.

- Full-Stack Developer: Frontend + backend integration, responsive design, cloud deployment.

2. Role-Specific Qualifications

Backend Developer

- Technical Skills: Python, Java, Node.js, SQL/NoSQL DBs, API design, cloud (AWS/Azure).

- Experience: 1–3 years (junior), 3–5 years (mid), 5+ (senior).

- Certifications (optional): AWS Developer, Docker/Kubernetes.

- Soft Skills: Analytical thinking, collaboration.

AI Engineer

- Technical Skills: Python, TensorFlow/PyTorch, NLP/CV frameworks, cloud ML platforms.

- Experience: 2+ years ML experience (internships count for juniors).

- Certifications: Google TensorFlow Developer, AWS Machine Learning.

- Soft Skills: Research mindset, problem-solving.

Full-Stack Developer

- Technical Skills: React/Vue/Angular, Node.js/Express/Django, REST & GraphQL APIs, CI/CD.

- Experience: 2–4 years (mid-level target).

- Certifications: Frontend/Cloud Dev optional.

- Soft Skills: Adaptability, cross-functional teamwork.

3. Diversity & Inclusion Guidelines

- Blind Screening: Remove name, gender, and personal identifiers during initial screening.

- Bias Training: Hiring managers must undergo annual DEI training.

- Equal Opportunity Statement: All job posts include anti-discrimination clauses.

- Diverse Panels: At least one interviewer from a diverse background.

- Pay Equity Audits: Ensure compensation fairness across gender and background.

4. Compensation & Benefits

- Salary Bands:

- Backend: PKR 150K–350K/month (entry-mid), negotiable for senior.

- AI Engineer: PKR 200K–450K/month (higher due to niche skills).

- Full-Stack: PKR 180K–400K/month.

- Benefits:

Health insurance, paid leaves (14–20 days/year), flexible work hours, remote options.

- Probation Period: 3–6 months with performance reviews at 90 days.

5. Onboarding Framework

- Orientation: Company culture, HR policies, tools & workflows.

- Technical Training: Role-based mentorship, access to internal documentation.

- Probation Evaluation:

- 30-day check-in: Adaptation & engagement.

- 60-day check-in: Skill performance review.

- 90-day evaluation: Decision on confirmation/extension.

6. Approval Workflow

- Stakeholders: HR → Technical Lead → Department Head → CEO/CTO.

- Documentation Required:

- Job requisition form

- Interview feedback sheets

- Salary approval memo

- Timelines:

- Requisition approval: 3 days

- Sourcing & screening: 2–4 weeks

- Final hiring decision: within 45 days

7. Legal & Compliance Requirements

- Contracts: Role-specific contracts with NDAs and IP clauses.

- Background Checks: Education, employment history, criminal record.

- Data Privacy: GDPR/local compliance for candidate data storage and deletion.

- Non-Compete Agreements: For sensitive roles (AI, backend security).
